PERSONAL DETAILS

Current Location	Malappuram
Date of birth	March 22, 2000
Gender	Female

EDUCATION

Graduation	B.Sc (Computers) Marthoma College, Chungathara with Score 63.50% in Aug 2021
Class XII	Kerala with 87% in 2018
Class X	Kerala with 98% in 2016
Certification Course	Introduction To C Programming in C (February 2022 - April 2022) Android App Development using Block Programming (August 2020 - September 2020)

INTERNSHIPS AND PROJECTS

Projects	**Criminal Face Identification using Python,Android** (Duration December 2020 - May 2021) This project is aimed to identify the criminals in any investigation department. Here the technique is we already store some images of the criminals in our database along with his details and those images are segmented into many slices say eyes, hairs, lips, nose, etc. These images are again stored in another database record to identify any criminals; eyewitnesses will see the images or slices that appear on the screen by using it we develop the face, which may or may not be matched with our images. If any image is matched up to 99 percent then we predict that he is only the criminal. Thus, this project provides a very friendly environment for both operators and eyewitnesses to easily design any face that can easily identify criminals. Skills used - Python,Android,Macromedia Dreamweaver,Html5,CSS,MySQL **Online bag shopping website** (Duration August 2022 - October 2022) An e-commerce website for bags. Skills used - Python,Html5,CSS,MySQL

SKILLS AND ACHIEVEMENTS
